专业·领先·增值

Framework

1. Explain ethics and professionalism
2. Reasons for adopting ethics
3. Framework for ethical decision making

8-388

专业·领先·增值

Ethics

➤ ***Definition:***

- The guiding beliefs or ideals characterizing a society or societal group.
- The study of moral principles, which can be described as the study of good and bad behavior or the study of making good choices as opposed to bad choices.
 - ✓ Moral principles or ethical principles are beliefs regarding what is good, acceptable, or obligatory behavior and what is bad, unacceptable, or forbidden behavior.

9-388

专业·领先·增值

Ethical conduct

➤ **Definition:**

- Behavior that follows moral principles and balances self-interest with both the direct and the indirect consequences of the behavior on others.
- Actions that are perceived as beneficial and conforming to the ethical expectations of society.
 - ✓ E.G. Telling the truth about the risks or costs associated with a recommended investment
- Governments and related entities may establish laws and/or regulations to reflect widely shared beliefs about obligatory and forbidden conduct.
- Differences in laws may reflect differences in beliefs and values.
 - In some countries, the law requires that an investment adviser act in the best interests of his or her clients.
 - Other countries require that investment professionals recommend investments that are suitable for their clients.

10-388

专业·领先·增值

Code of ethics

➤ **Definition:**

- Specific communities or societal groups in which we live and work sometimes codify their beliefs about obligatory and forbidden conduct in a written set of principles, often called a code of ethics.

➤ **Role:**

- Adopt a code of ethics to communicate the organization's values and overall expectations regarding member behavior
- Serves as a general guide for how community members should act
 - ✓ The code states that members and candidates "place the integrity of the investment profession and the interests of clients above their own personal interests."

11-388

专业·领先·增值

Standards of conduct

- Some communities will also expand on their codes of ethics and adopt explicit rules or standards that identify specific behaviors required of community members.

➤ **Role:**

- Serve as benchmarks for the minimally acceptable behavior of community members and can help clarify the code of ethics
 - ✓ The standards of professional conduct outline minimally acceptable behaviors expected of all CFA institute members and candidates.

12-388

专业·领先·增值

Standards of conduct

- Which of the following statements is most accurate? Standards of conduct:
 - A. are a necessary component of any code of ethics.
 - B. serve as a general guide regarding proper conduct by members of a group.
 - C. serve as benchmarks for the minimally acceptable behavior required of members of a group.

➤ Correct Answer : C

- Standards of conduct serve as benchmarks for the minimally acceptable behavior required of members of a group. Some organizations will adopt only a code of ethics, which communicates the organization's values and overall expectations regarding member behavior.

Ethics and Professionalism

- A **job** is very simply the work someone does to earn a living.
- A **vocation** is a job or occupation to which someone is particularly well suited and is very dedicated.
- A **profession** is the ultimate evolution of an occupation, resulting from the efforts of members practicing the occupation at a high level and creating a set of ethics and standards of conduct for the entire group.
 - Based on specialized knowledge and skills;
 - Based on service to others;
 - Practiced by members who share and agree to adhere to a common code of ethics.

14-388

专业·领先·增值

Ethics and Professionalism

➤ Customer VS. Client

- A customer purchases goods or services in a single transaction or series of transactions and pays for each transaction or series of transactions.
 - ✓ The relationship between customer and professional is based on **transactions**.
- A client enters into an ongoing relationship with a professional, hiring the professional to use his or her special knowledge for the benefit of the client, usually for a fee.
 - ✓ The relationship between client and professional is based on **trust**.
 - ✓ In exchange for the agreed-on fee, the professional accepts the duty to place the client's interests first at all times.

15-388

专业·领先·增值

Ethics and Professionalism

- The code of ethics informs and provides some assurance to the public that the profession's members will use their specialized skills and knowledge in service of others.
- Some codes will be enhanced and clarified by the adoption of standards of conduct or specific benchmarks of behavior required of members.
 - **Principle-based standards:** based on the shared principles of honesty, integrity, transparency, diligence, and placing client interests first
 - ✓ The CFA institute code and standards
- **Rule-based standards:** narrowly defined, applying to specific groups of individuals in specific circumstances

16-388

专业·领先·增值

Challenges to ethical conduct

- People tend to believe that they are ethical people and that their ethical standards are higher than average. (Overconfidence)
 - Overconfidence can lead to faulty decision making.
 - In general, the overconfidence bias leads us to place too much importance on internal traits and intrinsic motivations.
 - ✓ "I'm honest and would not lie"
- Decision makers often fail to recognize and/or significantly underestimate the effect of **situational influences**.

17-388

专业·领先·增值

Situational influences

- **Definition:**
 - External factors, such as environmental or cultural elements, that shape our thinking, decision making, and behavior.
- **Situational influences** have a very powerful and often unrecognized effect on our thinking and behavior.
 - **Factors:**
 - ✓ Money
 - ✓ Promotions
 - ✓ Prestige
 - ✓ Loyalty to employer and colleagues
 - ✓ A strong compliance culture
 - E.G. The bystander effect, the story of Enron corporation

18-388

专业·领先·增值

Situational influences

- Which of the following statements is *most* accurate?
 - A. Large financial rewards, such as bonuses, are the most powerful situational influences.
 - B. When decision making focuses on short-term factors, the likelihood of ethical conduct increases.
 - C. Situational influences can motivate individuals to act in their short-term self-interests without recognizing the long-term risks or consequences for themselves and others.
- **Correct Answer : C.**
 - Situational influences can motivate individuals to act in their short-term self-interests without recognizing the long-term risks or consequences for themselves and others. Large financial rewards are powerful situational influences, but in some situations, other situational influences, such as loyalty to colleagues, may be even more powerful.

19-388

专业·领先·增值

The importance of ethical conduct

- The investment industry serves society by matching those who supply capital, or money, with those who seek capital to finance, or fund, their activities.
 - *Borrowers* : those who seek capital
 - *Investors* : those who supply capital
- Investors and society benefit when capital flows to borrowers that can create the most value from the capital through their products and services.
- Capital flows more efficiently between investors and borrowers when financial market participants are confident that all parties will behave ethically.

20-388

专业·领先·增值

The importance of trust

- Ethics always matter, but ethics are of particular importance in the investment industry because the investment industry and financial markets are **built on trust**.
- **Reasons:**
 - The nature of the client relationship
 - Differences in knowledge and access to information
 - The nature of investment products and services
- **Effects of ethical behavior :**
 - Lead to broader participation in the markets
 - Protection of clients' interests
 - More opportunities for investment professionals and their firms
 - Lead to higher levels of success and profitability
 - Enjoy lower relative costs
- **Effects of unethical behavior :**
 - Erodes and can even destroy trust

21-388

专业·领先·增值

Ethical vs. Legal standards

- Laws and regulations often codify ethical actions that lead to **better outcomes** for society or specific groups of stakeholders.
 - Compliance with the rule reduces the risk that clients will invest in securities without understanding the risks involved, which, in turn, reduces the risk that clients will file complaints and/or take legal action if their investments decline in value.
 - Complying with the rules also reduces the risk that regulators will initiate an investigation, file charges, or/and discipline or sanction you and/or your employer.
- Although laws frequently codify ethical actions, legal and ethical conduct are not always the same.

22-388

专业·领先·增值

Ethical vs. Legal standards

- The law is not always the best mechanism to reduce unethical behavior.
 - Laws typically follow market practices.
 - Regulators' responses typically take significant time, during which the problematic practice may continue or even grow.
 - A new law may be vague, conflicting, and/or too narrow in scope.
 - Laws vary across countries or jurisdictions, allowing questionable practices to move to places that lack laws relevant to the questionable practice.
 - Laws are also subject to interpretation and compliance by market participants, who may choose to interpret the law in the most advantageous way possible or delay compliance until a later date.

23-388

专业·领先·增值

Ethical vs. Legal standards

- Ethical conduct goes beyond what is legally required and encompasses what different societal groups or communities, including professional associations, consider to be ethically correct behavior.
- Ethics requires judgment—the ability to make considered decisions and reach sensible conclusions.
 - Actively considering the interests of stakeholders;
 - Trying to benefit multiple stakeholders;
 - Minimizing risks, including reputational risk.

24-388

专业·领先·增值

Ethical vs. Legal standards

- Which of the following statements is *most* accurate?
 - A. Increased regulations are the most useful means to reduce unethical behavior by market participants.
 - B. Regulators quickly design and implement laws and regulations to address practices that adversely affect the fairness and efficiency of markets.
 - C. New laws designed to reduce or eliminate conduct that adversely affects the markets can create opportunities for different, but similarly problematic, conduct.

- **Correct Answer : C**

- New laws designed to reduce or eliminate conduct that adversely affects the markets can create opportunities for different, but similarly problematic, conduct.

Ethical decision-making frameworks

- **Adopting the ethical decision making framework:**

- enhance the ability and the motivation of employees to act ethically;
- minimize the likelihood of unethical actions;
- allows investment professionals to bring the principles of the code of ethics to life;
- development, maintenance, and demonstration of a strong culture of integrity within the firm;
- help professionals to determine the best course of action to fulfill their responsibilities in an ethical manner;
- help a decision maker see the situation from multiple perspectives and pay attention to aspects of the situation that may be less evident with a short-term, self-focused perspective;
- facilitate the decision-making process for all decisions.

26-388

专业·领先·增值

Ethical decision-making frameworks

- **Adopting a code** that clearly lays out the ethical principles that guide the thought processes and conduct the firm expects from its employees is a critical first step.
- We need to exercise ethical decision-making skills to develop the muscle memory necessary for fundamentally ethical people to make good decisions despite the reality of conflicts and our natural instinct for self-preservation.
- Establishing an ethical framework to guide your internal thought process regarding how to act is a crucial step to engaging in ethical conduct.

- **Ethical Decision-Making Framework**

- **Identify:** Relevant facts, stakeholders and duties owed, ethical principles, conflicts of interest
- **Consider:** Situational influences, additional guidance, alternative actions
- **Decide and act**
- **Reflect:** Was the outcome as anticipated? Why or why not?

◆ Proceedings

- **Primary Principles:**
 - fairness of the process to members and candidates
 - confidentiality of the proceedings.
- The CFA Institute Board of Governors maintains oversight and responsibility for the **Professional Conduct Program (PCP)**.
- The **Disciplinary Review Committee (DRC)** is a volunteer committee of CFA charterholders who serve on panels to review conduct and partner with Professional Conduct staff to establish and review professional conduct policies.
- **PCP and DRC** are responsible for enforcement of the Code and Standards.

30-388

专业·领先·增值

Proceedings

- Professional Conduct inquiries come from a **number of sources**:
 - **Self-disclosure** on annual Professional Conduct Statements of involvement in civil litigation or a criminal investigation, or that the member or candidate is the subject of a written complaint.
 - **Written complaints** about professional conduct received by the Professional Conduct staff.
 - Evidence of misconduct by a member or candidate that the Professional Conduct staff received through public sources, such as a media article or broadcast.
 - A report by a CFA **exam proctor** of a possible violation during the examination.

31-388

专业·领先·增值

Proceedings

- Once an inquiry is initiated, Professional Conduct staff may requests (in writing) an explanation from the subject member or candidate and may:
 - interview the subject member or candidate
 - interview the complainant or other third parties
 - collect documents and records relevant to the investigation
- The Designated Officer may decide:
 - that no disciplinary sanctions are appropriate
 - to issue a cautionary letter
 - to discipline the member or candidate
- Sanctions imposed by CFA Institute may have significant consequences:
 - **public censure**
 - **suspension** of membership and use of the CFA designation
 - **revocation** of the CFA charter
- Candidates enrolled in the CFA Program who have violated the Code and Standards or testing policies may be **suspended or prohibited** from further participation in the CFA Program.

32-388

专业·领先·增值

The hearing panel

- If the member or candidate does not accept the charges and proposed sanction, the matter is referred to a panel composed of DRC (Discipline Review Committee) members and CFA Institute member volunteers.
- Panels review **materials** and presentations from Professional Conduct staff and from the member or candidate.
- The panel's task is to determine whether a violation of the Code and Standards or testing policies occurred and, if so, what sanction should be imposed.

Comparisons of AMC and Code and Standards

➤ AMC

- The Asset Manager Code of Professional Conduct (AMC), which is designed, in part, to help asset managers comply with the regulations mandating codes of ethics for investment advisers.
- AMC was drafted **specifically for firms**.

➤ Code and Standards

- Aimed at **individual investment professionals** who are members of CFA Institute or candidates in the CFA Program.

34-388

专业·领先·增值

Ethics & Professional Standards

➤ Members of CFA Institute (“Members and Candidates”) must:

1. Act with **integrity, competence, diligence, respect, and in an ethical manner** with the **public, clients, prospective clients, employers, employees, colleagues** in the investment profession, and other participants in the **global capital markets**.
2. Place the **integrity** of the **investment profession** and the **interests of clients** above their own personal interests.
3. Use **reasonable care** and exercise **independent professional judgment** when conducting investment analysis, making investment recommendations, taking investment actions, and engaging in other **professional activities**.
4. Practice and **encourage others to practice** in a professional and ethical manner that will reflect credit on themselves and the profession.
5. Promote the **integrity and viability** of the **global capital markets** for the ultimate benefit of society.
6. **Maintain and improve** their **professional competence** and strive to maintain and improve the competence of other investment professionals.

Standard I (A): Guidance

- **Guidance - Investment Products and Applicable Laws**
- 15. Members and candidates involved in creating or maintaining investment services, investment products, packages of securities and derivatives should be mindful of where these products or packages will be sold as well as their places of origination. (the place of sales and origination)
- 16. The applicable laws and regulations of the countries or regions of origination and expected sale should be understood by those responsible for the supervision of the services or creation and maintenance of the products or packages.
- 17. Should make reasonable efforts to review whether associated firms that are distributing products or services also abide by the laws and regulations.
- 18. Should undertake necessary due diligence when transacting cross-border business to understand the multiple applicable laws and regulations.
- 19. Seek appropriate guidance from the firm's compliance or legal departments and legal counsel outside the organization when uncertain about which laws or regulations in conducting business in multiple jurisdictions.

Standard I (A) : Procedures

- **Recommended procedures - For members and candidates**
- 20. **Stay informed:** 1)Should establish or encourage employers to establish a procedure by which employees are regularly informed about changes in laws, rules and regulations. 2)Provide such information in the form of memorandums distributed to employees in the organization. 3)Participation in an internal or external continuing education program is a practical method of staying current.
- 21. **Review procedures:** Should review, or encourage their employers to review, the firm's written compliance procedures on a regular basis to ensure that the procedures reflect current law and provide adequate guidance to employees about what is permissible conduct under the law or the Code and Standards.
- 22. **Maintain current files:** Should maintain or encourage their employers to maintain readily accessible current reference copies of applicable statutes, rules, regulations.

44-388

专业·领先·增值

Standard I (A) : Procedures

- **Recommended procedures - For Firms**
- 23. The formality and complexity of compliance procedures for firms depend on the nature and size of the organization and the nature of its investment operations.
- 24. Should encourage firms to consider the following policies and procedures:
 - ✓ **Develop or adopt a code of ethics:**
 - ◆ Encourage supervisors or managers to adopt a code of ethics.
 - ◆ When in ethical dilemmas, adhering to the Code facilitates solutions and prevent the need of a "whistleblowing" solution publicly alleging concealed misconduct.
 - ◆ Asset Manager Code of Professional Conduct, may be used as the basis for the codes for firm.
 - ✓ **Provide information on applicable laws;**
 - ✓ **Establish procedures for reporting violations.**

Standard I(A): Case 1-2

- **Case*1. (Notification of Known Violations)** Allen found overstatement of earnings in files prepared for regulators, he seeks advice of firm's general counsel, who says it would be difficult for regulator to blame Allen for any wrongdoing involved.
 - **Comment:** As the counsel does not give clear justification for the legitimacy of the situation, Allen must report to his supervisor and seek independent legal advice and determine whether the regulator should be notified of the error. Cannot be absolved from requirements to comply with law/regulation in spite of having sought advice of legal counsel.
- **Case*2. (Dissociating from a Violation)** Brown finds his customer concealed losses in foreign branch and the preliminary prospectus has been distributed for the underwriting.
 - **Comment:** It's clear violation, Brown must report to supervisor. If not remedied, he also must dissociate and seek further legal advice to determine appropriate action.

Standard I(A): Case 3-4

- **Case*3. (Dissociating from a Violation)** Washington finds his employer omits some performance in calculating composite to inflate performance, and is asked to use promotional material that includes erroneous number to solicit business.
 - **Comment:** The employer commits misrepresentation; Washington must dissociate from that and bring the fact to supervisor or compliance dept. If it's not remedied, he should consider whether resignation is appropriate, even consider other employment, because using the erroneous number would be construed as assisting in violation.
- **Case 4. (Following the Highest Requirements)** Collins, a Wall Street analyst works in a developing country with little laws concerning insider trading.
 - **Comment:** Collins should be aware of the risk and adhere to the Code and Standards which is more strict and address material nonpublic information officially.

Standard I(A): Case 6

➤ **Case 6. (Laws and Regulations Based on Religious Tenets)** Janney's firm receives expressions of interest from potential clients from the Middle East who are seeking investments that comply with Islamic law. The marketing and promotional materials can not determine whether or not the fund is a appropriate investment for an investor seeking compliance with Islamic law. The fund is distributed globally. In Janney's concern, the reputation of the fund is very important and she believes disclosure of whether or not the fund complies with Islamic law could help minimize potential mistakes with placing this investment.

- **Comment:** Members and candidates will need to be aware of the differences between cultural and religious laws and requirements as well as the different governmental laws and regulations. In their efforts to acknowledge areas with different law systems, Janney and the firm could be proactive in determining the suitability of the new fund in that area.

➤ **Case*7. (Reporting Potential Unethical Actions)** Blume, a portfolio manager, notes that a broker from a country in Europe brought some new business to their firm. After the introduce of new business, this broker has been allocated payments for research works. However, she knows the portfolios do not invest in securities in the broker's country. And she has not seen any research come from this broker. Blume asks her supervisor about the name being on the list and is told that the research has been distributed to the marketing department and that the name being on the list is OK. She believes that what is going on may be that the broker is being paid for new business through the inappropriate research payments and wishes to dissociate from the misconduct.

- **Comment:** When reporting this situation, Blume must comply with the firm's policies and procedures. The procedures may include discussions with her supervisor or someone in a designated compliance department. She should communicate her concerns appropriately while advocating for disclosure between the new broker relationship and the research payments.

White's communications appear to conflict with the recent regulatory announcements.

- **Comment:** White is in violation of Standard I(A)-knowledge of the law because her communications do not comply with the new guidance and regulation governing use of social media. White must be aware of the evolving legal requirements pertaining to new and dynamic areas of the financial services industry that are applicable to her. She should seek guidance from appropriate, knowledgeable, and reliable sources, such as her firm's compliance function, service providers, or outside counsel, if she does not personally follow legal and regulatory trends affecting her professional responsibilities.

- **Case*15 (Presenting Out-of-Date Information, NEW)** Finch directs the sales team and provides fact sheets which include investment strategy and target distribution rates on funds to clients regularly. He continues to distribute sheets to the team without updates regardless that some he knows are out of date.
 - **Comment:** Finch is violating Standard I(C)-misrepresentation by providing information that misrepresents aspects of the funds. By not providing the sales team and ultimately the clients with the updated information, he is misrepresenting the potential risks associated with the funds with outdated fact sheets. Finch can make a distinguishing effort to inform clients about this situation, as well as find the appropriate data for clients before they sign the contract.

- **Case 16 (Overemphasis of Firm Results, NEW):**
- However, in the situation of all the funds outperformed their respective benchmarks, Anderson's assertion for that advertisement is misleading. Funds may not have to exceed the median in a sector comparison to exhibit positive returns for investors.
 - Members and candidates should make sure their marketing efforts do not violate Standard I(C)-misrepresentation. Unless the returns of a single fund reflect the performance of a firm as a whole, the use of a singular fund for performance comparisons should be avoided.

(“Pump-Priming” Strategy)** In order to demonstrate best liquidity of a new contract, Gonchar, chairman of the ACME Futures Exchange, enters into agreements with members so that they commit to a substantial minimum trading volume on the new contract for a specific period in exchange for reductions of commission.
 - **Comment:** If ACME fully discloses its agreement with members to boost transactions over some initial launch period, it does not violate Standard II(B)-market manipulation. ACME’s ultimate purpose is benefit its clients with better services rather than harm their clients.
- **Case 6. (Creating Artificial Price Volatility)** Gordon believes the earnings projection of Hygiene is substantially underestimated. Failing to get confirmation from the CFO, she tries to force a comment from the company by disseminating unrealistically high earnings projection to one of her clients who follow a momentum style.
 - **Comment:** If Gordon write this report with clear indication of assumptions she used, frame her earnings projection in a range of possible outcomes and distribute fairly to all clients she served, she will be not in violation of any code and standard. ➤ Understanding the Application of Loyalty, Prudence, and Care(new)

4. Standard III(A) does not render all members and candidates fiduciaries. However, Standard III(A) requires members and candidates to work in the client's best interest no matter what the job function.
 - The conduct may or may not rise to the level of being a fiduciary, depending on the type of client, whether they are giving investment advice, and the many facts and circumstances surrounding a particular transaction or client relationship.
 - ✓ A member or candidate who does not provide advisory services to a client, but who acts only as a **trade execution** professional must prudently work in the client's interest when completing requested trades.

➤ Guidance - Identifying the Actual Investment Client

5. Determine the identity of the "client" to whom the duty of loyalty is owed.

4 types of clients:

- ✓ **Individual:** In the context of an investment manager managing the personal assets of an individual, the client is the owner of the asset.
- ✓ **Beneficiary:** When the manager is responsible for the portfolios of pension plans or trusts, the client is the beneficiaries of the plan or trust. The duty of loyalty is owed to the ultimate beneficiaries.
- ✓ **Mandate:** Members and candidates managing a fund to an index or an expected mandate owe the duty of loyalty, prudence, and care to the stated mandate.
- ✓ **Investing public:** The client may be the investing public as a whole, the goals of independence and objectivity of research surpass the goal of loyalty to a single organization.

Standard III(A): Guidance

➤ Guidance - Developing the Client's Portfolio

6. The duty of loyalty, prudence, and care to client is especially important because the investment manager typically possesses greater knowledge in investment than the client does. This disparity places the individual client in a vulnerable position; the client must trust the manager.
 - ✓ The manager in these situations should ensure that the client's objectives and expectations of the account are realistic and suitable to their circumstances and that the risks involved are appropriate.
 - ✓ In most circumstances, recommended investment strategies should relate to the long-term objectives and circumstances of the client.
7. Investment decisions must be judged in the context of the total portfolio rather than by individual investment within the portfolio.

9. Whenever using client brokerage to purchase goods or services that do not benefit the client, should disclose to clients the methods or policies followed in addressing the potential conflict.
 - ✓ A member or candidate who pays a higher commission than he or she would normally pay to purchase goods or services, without corresponding benefit to the very client, violates III (A).
 - ✓ **Mutually benefit:** 若client 1多付钱，soft \$只能给client 1使用；若没有多付，只要与其它clients互惠互利，soft \$就能给其它客户使用，但要披露自己如何解决其中的利益冲突。

- ✓ Obligated to seek "best execution" and "best price", and assured that the goods or services purchased from the brokerage will benefit the account beneficiaries.
 - ✓ "**Best execution**" refers to a trading process that seeks to maximize the value of the client's portfolio within the client's stated investment objectives and constraints.

Although he believes the stock is overvalued, he purchases the stock considering maintaining the company's good favor to his firm. And the anti-takeover action succeeds.

● **Comment:** The trustee must act for the beneficiary's interest (in this case: the plan participants), not the benefit of the management. The guiding principle is the appropriateness of the investment for the plan, not whether the decision benefits Wiley or the company that hired him. So, it is a violation.

➤ **Case 2 (Client Commission Practices).** JNI, a successful investment counseling firm for local pension plans, directs large portion of brokerage to Thompson, because of close relationships between the executives of the two firms. Thompson's commission structure is higher despite of the average research services and execution capabilities. Standard III(C): Recommended Procedures

- **Recommended Procedures**
 9. Investment policy statement.
 - ✓ Include needs, circumstances, performance benchmarks and objectives, and review at least annually;
 - ✓ An appropriate suitability determination will not prevent some investments or investment actions from losing value.
 - ✓ Update investors' objectives and constraints periodically
 10. Regular updates.
 - ✓ Objectives and constraints should be maintained and reviewed periodically to reflect any changes in the client's circumstances.
 - ◆ Changes in either factor may result in a fundamental change in asset allocation.
 - ✓ Should regularly compare constraints with capital market expectations to arrive at an appropriate asset allocation.
 - ✓ Annual review is reasonable unless business or other reasons, such as a major change in market conditions, dictate more frequent review.
 - ✓ Should document attempts to carry out review if circumstances prevent it.

- **Case*1 (Investment Suitability-Risk Profile).** Smith recommends investing 20% of both his 2 clients' portfolios in zero dividend yield small-cap hi-tech issues. One of them having a large asset base is willing to invest partly aggressively while the other only wants to achieve a steady return with low volatility.
 - **Comment:** The two clients have different financial circumstances and objectives. Smith's recommendation is not suitable for steady one. It's a violation.
- **Case*2 (Investment Suitability-Entire Portfolio).** Walters suggests his client to use covered call options in the equity portfolio to improve the performance in a portfolio perspective. He educates his client about all possible outcomes, such as tax consideration, downside risk etc.
 - **Comment:** Walters has considered the characteristics of the client's entire portfolio and thoroughly explained the investment to the client. It's not a violation.

Standard III(C): Case 5-6

- **Case*5 (IPS Requirements and Limitations).** Gubler, a manager of insurance company, has an IPS mandate for highly liquid investments. Recently he is attracted by a VC seed fund which has a fairly long lock-up period and after extensive analysis he invests 4% in the seed fund, leaving the portfolio's total equity exposure still well below its upper limit.
 - **Comment:** Gubler is violating Standard III(A)-loyalty, prudence and care, as well as Standard III(C)-suitability because of the liquid conflict between IPS and practice.
- **Case 6 (Submanager and IPS Reviews).** As business grows in large, Ostrowski wants to find a submanager to help manage the fund. He uses the CFA Institute model "request for proposal" to design a questionnaire for his search and receives seven back by deadline. For the least impact on firm's bottom line, Ostro chooses the one that charges the lowest fees.
 - **Comment:** Ostrowski violates Standard III(C)-suitability by making the decision on fee structure only. He should compare clients' risk profile with the investment strategy and ensure the appropriateness of the manager's service.

In order to improve his short-term performance for more reward, he changes the investment strategy and purchases several high-beta stock which are contrary to clients' IPS and leads to clients' doubt as no notice of change in their objective or strategy.
 - **Comment:** Snead violated Standard III(C)-suitability by investing in high-beta stocks for clients with long-term objectives. He made this change for his own purpose not for the benefit of the clients.
- **Case 8:(Investment Suitability)** Shrub owns and operates an investment advisory firm, Conduit. To attract more clients, Shrub offers lower-than-normal fees to his friend Reed whose company EI has two top-performing funds. So clients quickly invest with Conduit to access to EI fund while no one is turned away by Conduit for the sake of expanding its assets.
 - **Comment:** Shrub has violated Standard III(C)-suitability because the risk profile of the fund may not be suitable for every client. Shrub needs to establish an IPS for each client and recommend investments accordingly. And he should fully discuss the risks of a planned purchase and provide reasons why it might not be suitable for a client before executing their requests that may not align with their IPS.

Generally, the standard does not prohibit showing past record so long as it is fully disclosed where the performance comes from and the person's role in it.
- **Case*4 (Performance Presentation and Simulated Results).** Davis produced performance results from 1990-95 based on historical data and simulated performance results for the period from 1996-2003. He also manipulates the accounts that make up the composite over time.
 - **Comment:** Kilmer violated Standard III(D)-performance presentation. He misrepresents the facts in the promotional material sent to prospective clients, and fails to include disclosure.
- **Case*6 (Performance Attribution Changes, NEW)** When Purell is reviewing the performance attribution reports for clients, he finds that the current attribution methodology indicates that stock selection contributed negatively to the calculated return. After several different scenarios, Purell discovers that calculating attribution by comparing each stock with its industry and then rolling the effect to the sector level can better reflect manager's stock selection. So he uses the revised methodology in the report instead.
 - **Comment:** Revising the attribution methodology without noticing clients violates Standard III(D)-performance presentation. Purell modifies the attribution methodology only for the benefit of his firm to perceiveably improve their investment strategy, which is disadvantaging the clients. If Chisolm uses confidential or privileged information obtained from former employer, it is violation. If Chisolm maintains his duty of loyalty before joining new firm and adheres to non-compete agreement and just use public information about former firm after departing to contact former clients, it is not violation.

Standard IV(A): Case 14

- **Case*14 (Leaving an Employer, NEW)** Laura Webb just left her position as portfolio analyst at Research Systems, Inc. (RSI). Her employment contract included a non-solicitation agreement that requires her to wait two years before soliciting RSI clients for any investment related services. Upon leaving, Webb was informed that RSI would contact clients immediately about her departure and introduce her replacement. While working at RSI, Webb connected with clients, other industry associates, and friends through her LinkedIn network. Her business and personal relationships were intermingled because she considered many of her clients to be personal friends. Realizing that her LinkedIn network would be a valuable resource for new employment opportunities, she updated her profile several days following her departure from RSI. LinkedIn automatically sent a notification to Webb's entire network that her employment status had been changed in her profile.
 - **Comment:** Prior to her departure, Webb should have discussed any client information contained in her social media networks.
 - By updating her LinkedIn profile after RSI notified clients, she has appropriately placed her employer's interests ahead of her own personal interests. In addition, she has not violated the non-solicitation agreement with RSI, unless it prohibited any contact with clients during the two-year period.

- **Case*15 (Confidential Firm Information, NEW)** Sanjay Gupta is a research analyst at Naram Investment Management (NIM). NIM uses a team-based research process that results in a company view on the investment opportunities covered by the team members. Gupta provides commentary for NIM's clients through the company blog which is posted weekly on the NIM password protected website. According to NIM's policy, every contribution to the website must be approved by the company's compliance department before posting. Any opinions expressed on the website are disclosed as representing the perspective of the company. Gupta also writes a personal blog to share his experiences with friends and family. As with most blogs, Gupta's personal blog is widely available to interested readers through various internet search engines. Occasionally, when he disagrees with the team-based research opinions of NIM, Gupta uses his personal blog to express his own opinions as a counterpoint to the commentary posted on the NIM website. Gupta believes this provides his readers with a more complete perspective on these investment opportunities.

Upon returning to Specialty Investment Management, Hollis provides a full review of the meeting to the director of research, including a disclosure of the dinner attended.

- **Comment:** Hollis's actions did not violate Standard IV(B)-additional compensation arrangements.
 - ✓ Through gaining approval before accepting the meeting and declining the offered travel arrangements, Hollis sought to avoid any potential conflicts of interest between his company and ABC Oil.
 - ✓ Because the location of the dinner was not available prior to arrival and Hollis notified his company of the dinner upon his return, accepting the dinner should not impair his objectivity.

8. Once knowing a potential violation, supervisor must **promptly initiate an investigation to ascertain the extent of the wrongdoing**.

Standard IV(C): Recommended Procedures

➤ Recommended Procedures

9. Codes of ethics or compliance procedures
 - ✓ To ensure that a culture of ethics and integrity is created rather than merely a focus on following the rules, the principles in the code of ethics must be stated in a way that is accessible and understandable to everyone in the firm.
 - ✓ Codes vs. Procedures
 - ◆ **Codes:** Consist of fundamental, principle-based ethical and fiduciary concepts applicable to all of the firm's employees. And these concepts should be implemented by detailed, firmwide compliance procedures. → 原则
 - ◆ **Procedures:** Assist firm's personnel in fulfilling the responsibilities in codes of ethics, and make probable that the ideals in the codes will be adhered to in the day-to-day operation. → 实现步骤
 - ◆ Codes should be in plain language and address general fiduciary concepts. Codes presented in this way are effective in stressing to employees that they are in positions of trust and act with integrity all the time. Mingling compliance procedures in the codes goes against the goal of reinforcing the ethical obligation of employees.

➤ Implementation of compliance education and training(new)

12. Regular ethics and compliance training, in conjunction with adoption of a code of ethics, is critical to investment firms seeking to establish a strong culture of integrity and to provide an environment in which employees routinely engage in ethical conduct in compliance with the law.

13. Supervisors and firms must look closely at their incentive structure to determine whether it encourages profits and returns at the expense of ethically appropriate conduct.

- Only when compensation and incentives are firmly tied to client interests and how outcomes are achieved rather than how much income is generated for the firm, will employees work to achieve a culture of integrity.
- Training and education assist individuals in both recognizing areas that are prone to ethical and legal pitfalls and identifying those circumstances and influences that can impair ethical judgment.
- Education helps employees make the link between legal and ethical conduct and the long-term success of the business.

After her conversation with Frampton, one of the executives of H&V, Frampton immediately sells (front running) Timber stock from his own account and some discretionary client accounts. Other personnel also inform certain institutional customers of the changed recommendation before publication and dissemination to all H&V customers.

Standard V(A): Case 10

- **Case*10 (Sufficient Due Diligence)** Bob is responsible for sensitivity analysis on securitized subprime mortgages. He insists that the analysis should include a scenario run with – 10% for Year 1, – 5% for the Year 2, and then (to project a worst case scenario) 0% for Years 3 through Year 5. The manager think these assumptions too dire because there has never been a time in their available database when House Price Appreciation (HPA) < 0. Bob evaluates the securities in the worst-case scenario, an unlikely but possible environment. Based on the results, he does not recommend the purchase of the securitization. Against the market trends, the manager follows his recommendation and does not invest. The following year, the housing market collapses and the manager's portfolio outperforms its peer group that year.
- **Comment:** Bob's actions in running the scenario test adheres to Standard V(A)-diligence and reasonable basis. His concerns over recent trends provide a sound basis for further analysis. He understands the limitations of his model, when combined with the limited available historical information, to accurately predict the performance of the funds if market conditions change negatively.

➤ **Case 11 (use of quantitatively oriented models):** Liakos' client, Carapalis, is convinced that commodity prices will become more volatile. Carapalis asks Liakos to quickly engineer a strategy to benefit from this expectation. Because of tight deadline, the modeling group outsources parts of the work to trusted 3rd parties. Liakos implements the disparate components of the strategy as the firms complete them.

Within a month, Carapalis is proven correct. But her derivatives position returns huge losses, and the losses increase daily. Liakos investigates and realizes that, although each of the various components of the strategy had been validated, they had never been evaluated as an integrated whole. In extreme conditions, portions of the model worked at cross-purposes with other portions, causing the overall strategy to fail dramatically.

- **Comment:** Liakos violated Standard V(A)-diligence and reasonable basis. He must understand the statistical significance of the model results and be able to explain them to clients.

Liakos did not take adequate care to ensure a thorough review of the whole model; its components were evaluated only individually. Because Carapalis intended to implement the strategy as a whole rather than as separate parts, Liakos should have tested how the components interacted as well as how they performed individually.

➤ **Case *12 (Successful due diligence/failed investment):** Newbury is an investment adviser to high-net-worth clients. One of his clients asked him about a risky hedge fund which has a high expected return. Through diligence research, Newbury tell his client that this fund is using long short strategy in the energy sector and extensive leverage. After reviewing of the fund's track record, the principals involved managing the fund, the fees charged and the fund's risky profile, Newbury recommends the fund to this client because this client have a risky profile as well. However, several weeks later, the fund suffered a severe loss and the client is questioning Newbury about his work.

- **Comment :** Newbury's recommendation is appropriate. The investment is not guaranteed by Newbury's report. However, Newbury should discuss the his analysis process and the investment downside risk with client and make sure the client is fully understand the underlying risk combined to the expected return.

The factors Barry put into his model should be fully test and determine the effect on the model before he make recommendation for it.

Smith found one of the model contains very complex algorithm and something about a "black box". Smith recommended this model without researching the others because she think the complexity of this model will definitely impress the clients.
 - **Comment:** The complexity is not necessarily combined with a firm's investment style, and suitability of the model to clients. It is Smith's responsibility to view all the models and perform a sufficient level of diligence in reviewing this model before make recommendation.
 - Additionally, she should also check weather the "black box" aligns with the investment practices of the firm.

Jackson then pick 20 of the firms from this list and evaluate their last quarter and annual performance to determine which firm is the best selection.
 - **Comment:** A good performance and compliance with GIPS standard is not meaning that the underlying firm is the best choice for Jackson's firm. Jackson should conduct sufficient review of potential firms to satisfy the requirement of Standard V(A)-diligence and reasonable basis.
 - In this case, the ultimate purpose is to diversify clients' portfolios and to satisfy the suitability of the fund-of-funds product. Base on this purpose, Jackson should conduct a diligently research on firms' operations and other necessary facts.

There are several criteria when accepting a new manager to the platform. - Smith violated standard V(A)-diligence and reasonable basis, because exercising "diligence, independence, and thoroughness in analyzing investments, making investment recommendations, and taking investment actions" means that members and candidates must understand the technical aspects of the products they provide to clients.
 - ✓ Smith does not understand the model he is relying on to manage money.
 - ✓ Members and candidates should also make reasonable enquiries into the source and accuracy of all data used in completing their investment analysis and recommendations.
- Dupont violated V(A)-diligence and reasonable basis even if he does not trade securities or make investment decisions.

Even without owning the stocks, Robert would recommend D. Mining as a "buy" in the report and the market would go up once issued.
 - **Comment:** Robert must disclose the ownership of the D. Mining stocks in the report and to her employer before writing the report cause she would probably gain once she sells them.
- **Case *5 (conflicts of interest and compensation arrangement):** Dyson is managing pension funds with long term objectives. After his employer introduced a bonus compensation system that rewards portfolio managers on the basis of quarterly performance, Dyson changes his strategy and buys high beta stocks which are seemingly contrary to the client's IPS to boost short term performance without changing the IPS.
 - **Comment:**

Introduction to GIPS

I. Why were the GIPS Standard created?

- **GIPS are a set of ethical principles based on a standardized, industry-wide approach**
- **Misleading practices that hinder performance comparability:**
 - Representative accounts: showing a top-performing portfolio as representative of a firm's result.
 - Survivorship Bias: excluding "weak performance" accounts that have been terminated.
 - Varying Time Periods: showing performance for selected time periods with outstanding returns.

II. Who can claim compliance

- **Complying with the GIPS standards is voluntary**
- **Only an investment management firm that actually manage assets can claim compliance with the Standards.**
 - Plan sponsors & consultants → can't claim compliance unless actually manage assets.
 - Software (and vendor of software) cannot be compliant → can assist firms in compliance with GIPS
- **Firm-wide and full compliance**

IV. Composites

➤ A composite is a grouping of individual discretionary portfolios representing a similar investment strategy, objective, or mandate.

➤ A composite, such as Global Equities, must include all portfolios (current and past) that the firm has managed in accordance with this particular strategy.

➤ **The firm should identify which composite each managed portfolio is to be included in before the portfolio's performance is known.**

- This prevents firms from choosing portfolios to include in a composite in order to create composites with superior returns.

V. Verification

➤ **Verification is the review of an investment management firm's performance measurement processes and procedures by an independent third-party "verifier".**

- Third-party verification brings credibility to the claim of compliance and supports the overall guiding principles of full disclosure and fair representation of investment performance.

➤ **Verification tests:**

- Whether the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis.
- Whether the firm's processes and procedures are designed to calculate and present performance results in compliance with the GIPS standards.

➤ **A single verification report is issued in respect of the whole firm; verification cannot be carried out for a single composite.**
